Ubuntu – How do you Pronounce the Word Ubuntu- Part 2

Posted on June 04,2013 by Wayne Taylor

You may have read my first article called '[How Do You Pronounce the Word Ubuntu?](#)' It got no shortage of fame and created such a controversy out there that I had to fend off the Paparazzi with my bare hands and sleek ninja style. I like to tell myself that anyways. What matters is that the subject is still relevant and important. I was excited to read [Disposable Joe's post](#) over at SighWorld because he takes this topic to the nth degree and ties it in with all the other important components of the Ubuntu project. With Ubuntu becoming quickly a household name, Joe points out in a very humourous and educational way, why its important that we also pronounce the word correctly. I hope you enjoy his article and [here is the link](#).
