Ubuntu: How to Decrease Desktop Icon Size 16.04

Posted on March 13, 2017 by admin

It's quite funny how easy this was but how long it took me to figure this out so I just thought I'd throw this online in case anyone is as dumb as me. Hopefully it helps someone and if it does, don't tell anyone. ;)

Within Nautilus (your file browser) click the 4 square icon thing

Yes. It was

really that easy...
