## Morse Code in Music

Posted on August 11, 2014 by Wayne Taylor

As a licensed and active amateur radio operator, I started learning morse code a few months back. My reasoning is that it's like audible brail - why would I not want to learn that? If I was fluent at it I could communicate effectively without words... Anyway, my buddy Joe found this video on youtube which actually caught me off guard and make me wonder more of the history of Morse Code and what kind of people surround it. I was surprised to see some of the modern folks who used it... but I digress. For now, just watch this interesting video about modern use of morse code in music. Please note that there are some highly offensive sections so if you have kids this wouldn't be a good fit for them, sadly. Here is the [video about Morse Code in music](#).
