## Our Online Future Encapsulated

Posted on October 06,2015 by admin

A friend of mine sent me [this speech \(transcribed\)](#) today and I was absolutely unable to stop reading it right to the end. I found out that my browser has 'reader mode' which was cool, by the way. Read [this article](#). You'll learn about how you are victimized but it ends with some awesome inspiration. It encapsulates:

1. Our current situation of privacy invasion
2. Some super tangible and practical solutions we can start implementing
3. The bigger picture of the sharing of wealth (yes, he managed to get this in as well)

**Beautiful!!**
