How to Easily Open a Terminal in Ubuntu

Posted on August 12,2016 by admin

There are two ways:

1. FROM THE LAUNCHER ON THE LEFT

On the left side of your Ubuntu machine you'll see the vertical column of apps you can one-click open. Usually the terminal is here. It's the black box thing with the right-pointing greater than symbol thing and

underscore. Click it. It opens.

2. THROUGH THE DASH

1. push your super key (aka 'windows key' if you have a redeemed machine)
2. start typing 'terminal'
3. it shows up
4. click it with mouse or use arrow keys to navigate to it and push 'enter' key
5. it opens
